

Università degli Studi
del Molise

Università degli Studi
del Salento

Università di Zagabria

A project co-funded by the European Union
Adriatic New Neighbourhood Programme INTERREG/CARDS-PHARE

**MITIGATION OF THE EARTHQUAKE EFFECTS
IN TOWNS AND IN INDUSTRIAL REGIONAL DISTRICTS**

M.E.E.T.I.N.G.

Mitigation of the Earthquake Effects in Towns and in
INDustrial reGional districts

- Final Conference - Earthquake engineering

Presentation of the book
“Strategies for reduction of the seismic risk”

Termoli, July 13th - 14th 2008
College of Engineering, via Duca degli Abruzzi

Sunday, 13th, 2008

Technical tour

11.00 Visit of the Guardialfiera earth dam and the transportation infrastructures

12.00 Visit to the city of San Giuliano di Puglia hit by 2002 Molise earthquake

Lunch

16:00 Termoli: visit of the industrial area of the city and of the site of the new facilities of the University of Molise

Interreg MEETING dinner

Monday, July 14th

Welcome addresses

9:30 G. Cannata, Rector of the University of Molise
F. Testa, Dean of the College of Engineering

Opening session

10:00 D. Owen, Carnegie Mellon University, "The importance of the interaction between the experimental research, applied research and modelling"

Presentations

10.15 L. Deseri and G. Fabbrocino, "The MEETING Project"
10.30 P. Kvasnicka, "Seismic analysis of the reinforced soil wall Strikici at the highway Zagreb-Split-Dubrovnik"
10:45 G. Fabbrocino, "Overview of the research activities at the StreGa laboratory, University of Molise"
11:00 A. Lemme, "Sisma Molise 2002: il percorso della ricostruzione"

11:15 Coffee break

11:45 M. A. Aiello, "FRP reinforcements for strengthening masonry structures"
12.05 F. Santucci de Magistris, "Some open questions in seismic microzonation"
12:15 C. del Pinto, "The seismic network in the Molise region"
12:30 L. Evangelista, "Evaluation of soil stiffness by in situ innovative techniques"
12:45 C. Rainieri, "Operational Modal Analysis: overview and applications"
13:00 Z. Veinovic, "Preparatory works for liquefaction microzonation in Croatia"

13.15 Lunch

15.30 C. Visone, "Design of flexible retaining structures under seismic loadings"
15:45 E. Bilotta, "Tunnels under seismic loading: a review of damage case histories and protection methods"
16:00 A. di Carluccio, "Characterization of industrial facilities and components for seismic assessment"
16:15 E. Salzano, "The contribution to industrial risks of the accidental scenarios initiated by earthquakes"

16:30 Break

17:00 Round table on:

- Main outputs on the research activities of the project.
- Perspectives and opportunity for further found rising in the framework of IPA programme.
- Budget status conclusion of the project.

Session ends

18:00 G. Fabbrocino, Conclusions

Organizing Committee

G. Fabbrocino, University of Molise
F. Santucci de Magistris, University of Molise
L. Callari, University of Molise
L. Deseri, University of Trento

Scientific Committee

G. Fabbrocino, University of Molise
F. Santucci de Magistris, University of Molise
L. Deseri, University of Trento
P. Kvasnicka, University of Zagreb
